

Name	Low-hanging fruit exercise
Brief Description	<i>The term "low-hanging fruit" is a commonly used metaphor for doing the simplest or easiest work first, or for a quick fix that produces ripe, delectable results. In the environmental sciences' realm, the term refers to structure a strategy around the actions that produce the quickest environmental results at a lower cost.</i>
Methodology	<p>The facilitator prepares a visual support for the exercise (usually, a simple picture of a tree is sufficient). Participants are asked to add actions or solutions that they would like to implement, sorting them based on the level of complexity.</p> <p>With the support of the facilitator, participants cherry-pick the low-hanging solutions based on the expected results. To finalize the exercise, participants sort all the activities from the lowest-hanging fruit to the highest-hanging one.</p>
Estimated planning time needed:	< 1h
Objective	Identify areas that can enable quick gains via cherry-picking the actions that provide the quicker gains at lower cost
Time estimated:	0,5 - 1h
Composition of audience:	homogeneous
Experience level required:	Low to medium - a basic knowledge of the topic is required
Number of audience:	10 to 40
Level of complexity and possible challenges	Low - no major challenges identified

Picture	 A photograph of two ripe red apples hanging from a branch. The apples have a yellowish-red blush and are surrounded by green leaves. The background is a soft-focus green.
